This document is a response to teachers' requests for practical assistance in implementing California's history-social science framework. The document offers stimulating ideas to enrich the teaching of history and social science, enliven instruction for every student, focus on essential topics, and help make learning more memorable. Experiences and contributions of ethnic groups and women in history are integrated in this course model. The framework is divided into 11 units: (1) Connecting with Past Learnings: Uncovering the Remote Past; (2) Connecting with Past Learnings: the Fall of Rome; (3) Growth of Islam; (4) African States in the Middle Ages and Early Modern Times; (5) Civilizations of the Americas; (6) China; (7) Japan; (8) Medieval Societies: Europe and Japan; (9) Europe During the Renaissance, the Reformation, and the Scientific Revolution; (10) Early Modern Europe: The Age of Exploration to the Enlightenment; and (11) Linking Past to Present. Six of the 11 units delineated in the framework's 7th grade course description are developed in these course models. All units follow the same format. Each begins with a rationale and overview. Ways are suggested for teachers to coordinate the model with the state-adopted textbook for 7th grade. A presentation of activities to introduce and continue the sample topic are suggested to encourage students to apply what they have studied through projects. Each unit ends with an extensive annotated list of sample resources. (DK) This early work on Martin Luther is both expensive and hard to find in its first edition. It details the life of the monk responsible for translating the Bible from Latin into German and for inspiring the Lutheran movement. This is a fascinating work and is thoroughly recommended for anyone interested in the history of European religion. Many of the earliest books, particularly those dating back to the 1900s and before,
The Sacred Home in Renaissance Italy explores the rich devotional life of the Italian household between 1450 and 1600. Rejecting the enduring stereotype of the Renaissance as a secular age, this interdisciplinary study reveals the home to have been an important site of spiritual revitalization. Books, buildings, objects, spaces, images, and archival sources are scrutinized to cast new light on the many ways in which religion infused daily life within the household. Acts of devotion, from routine prayers to extraordinary religious experiences such as miracles and visions, frequently took place at home amid the joys and trials of domestic life — from childbirth and marriage to sickness and death. Breaking free from the usual focus on Venice, Florence, and Rome, The Sacred Home investigates practices of piety across the Italian peninsula, with particular attention paid to the city of Naples, the Marche, and the Venetian mainland. It also looks beyond the elite to consider artisanal and lower-status households, and reveals gender and age as factors that powerfully conditioned religious experience. Recovering a host of lost voices and compelling narratives at the intersection between the divine and the everyday, The Sacred Home offers unprecedented glimpses through the keyhole into the spiritual lives of Renaissance Italians.

"The creator of the 'essay,' Michel de Montaigne serves as a bridge between what we call the early modern and modernity. The Essays resemble a patchwork of personal reflections that tend toward a single goal: to live better in the present and to prepare for death. Montaigne constantly redefines the nature of his task in order to fashion himself anew and, in the end, offers an impressionistic model of descriptions based on momentary experiences. Over the centuries, the reception of Montaigne has been anything but simple. The institutionalization of an author depends on what one might call his or her 'ideological and historical trajectory.' An effect of 'globalization' has even reached Montaigne in recent years, bringing him sudden, worldwide visibility. His thought has become internationalized, and he is read, studied, and commented in most European countries as well as in North America, Latin America, and Asia."

The Civilization of the Renaissance in Italy (1860) is a work of art history by Swiss historian Jacob Burckhardt. Recognized today as the founder of modern art history and as one of the key thinkers of the nineteenth century, Burckhardt changed not only the way we think about the Renaissance in relation to European and world history, but the value placed on art as a tool for understanding historical developments. The Civilization of the Renaissance in Italy begins with a section on the historical events which sparked the Renaissance, focusing especially on the frequent military conflicts which marred the era as well as on the constant political upheavals undergone by such Italian regions and cities as Rome, Venice, and Florence. Burckhardt then
moves to a philosophical discussion of the development of individuality in Italian culture, arguing that the political circumstances of those living in the Republics enabled such thinkers as Dante and Petrarch to create art that corresponded with that newfound sense of individuality. The third section discusses one of the key elements of Renaissance culture: the revival of interest in the cultural products of the ancient world, especially Greece and Rome. Part four focuses on the prominence of discovery in Renaissance culture, for which Burckhardt looks to the colonial expedition of Columbus, the growth of the natural sciences, and the achievements of such poets and writers as Dante, Petrarch, and Boccaccio in discovering new ways to describe humanity and the human spirit. In the fifth section, the importance of societal customs and festivals is discussed, and in the sixth and final part, Burckhardt observes the profound shifts undergone by religion and morality in Italy at the time. The Civilization of the Renaissance in Italy is a thorough, dynamic work of art history that not only changed the study of history at universities around the world, but elevated the status of art in understanding the process of cultural change. With a beautifully designed cover and professionally typeset manuscript, this edition of Jacob Burckhardt’s The Civilization of the Renaissance in Italy is a classic of European art history reimagined for modern readers.

Written in the 16th century, The Prince remains one of the most influential books on political theory. Its author, Niccolo Machiavelli was an Italian diplomat and political theorist, and is considered the father of modern political thought. With an interdisciplinary approach that encompasses the history of ideas, political history, cultural history and art history, this volume, in the successful Routledge Worlds series, offers a sweeping survey of Europe in the Renaissance, from the late thirteenth to early seventeenth centuries, and shows how the Renaissance laid key foundations for many aspects of the modern world. Collating thirty-four essays from the field's leading scholars, John Jeffries Martin shows that this period of rapid and complex change resulted from a convergence of a new set of social, economic and technological forces alongside a cluster of interrelated practices including painting, sculpture, humanism and science, in which the elites engaged. Unique in its balance of emphasis on elite and popular culture, on humanism and society, and on women as well as men, The Renaissance World grapples with issues as diverse as Renaissance patronage and the development of the slave trade. Beginning with a section on the antecedents of the Renaissance world, and ending with its lasting influence, this book is an invaluable read, which students and scholars of history and the Renaissance will dip into again and again.

Scholars have long argued over whether the 1648 Peace of Westphalia, which ended more than a century of religious conflict arising from the Protestant Reformations, inaugurated the modern sovereign-state system. But they largely ignore a more fundamental question: why did the emergence of new forms of religious heterodoxy during the Reformations spark such violent upheaval and nearly topple the old political order? In this book, Daniel Nexon demonstrates that the answer lies in understanding how the mobilization of transnational religious movements intersects with—and can destabilize—imperial forms of rule. Taking a fresh look at the pivotal events of the sixteenth and seventeenth centuries—including the Schmalkaldic War, the Dutch Revolt, and the Thirty Years' War—Nexon argues that early
modern "composite" political communities had more in common with empires than with modern states, and introduces a theory of imperial dynamics that explains how religious movements altered Europe’s balance of power. He shows how the Reformations gave rise to crosscutting religious networks that undermined the ability of early modern European rulers to divide and contain local resistance to their authority. In doing so, the Reformations produced a series of crises in the European order and crippled the Habsburg bid for hegemony. Nexon’s account of these processes provides a theoretical and analytic framework that not only challenges the way international relations scholars think about state formation and international change, but enables us to better understand global politics today.

World History: Patterns of Interaction © 2012 is a highly integrated, high school world history textbook program with enhanced HISTORY® curriculum that provides teachers with a practical and motivational approach to help students think critically and reflectively. The Malleus Maleficarum is the best known and the most important treatise on witchcraft. It was written by the Catholic clergyman Heinrich Kramer and first published in 1487. It was a bestseller, second only to the Bible in terms of sales for almost 200 years. The top theologians of the Inquisition at the Faculty of Cologne condemned the book as recommending unethical and illegal procedures, as well as being inconsistent with Catholic doctrines of demonology. A classic account of the Reformation, revealing the issues and preoccupations which seemed central to the age and portraying its leading figures with vigour and realism. The book is an analysis of the religious, economic, cultural and political history of Europe during the period of the Reformation. Author G. R. Elton examines the history of
the period through the interrelationships between different forces in Europe at the time, such as the Holy Roman Emperor Charles V, the Papacy, reformers such as Martin Luther, John Calvin, Martin Bucer and Zwingli, and explores the resultant Counter-Reformation and the beginnings of European colonisation of other parts of the world such as South America. Its central focus is upon the conflict between Luther and Charles V. “A masterly survey by a fine historian. He has gone to great pains to understand and do justice to the theological side, and if political history is still his strength there is no doubt that this paperback in scholarship, perspective and information far outweighs in value and importance most of the hard-bound studies of the 16th century in the last fifty years.” —E. GORDON RUPP “It is extremely pleasant to welcome a new History of Europe series in which the inaugural volume is of such high merit. Dr. Elton sets himself a difficult task; the result is a book written with the bold, subtle, assured pen of an accomplished scholar.” —JOEL HURSTFIELD “Not since Ranke has any historian described the religious and political history of Central Europe during the Reformation with as much insight and authority.” —H. G. KOENIGSBERGER, History (London) “Dr. Elton has put all students in his debt by providing an up-to-date and highly readable account of the ecclesiastical, political, and social history of Europe during the vital years 1517 to 1559. This book can be unreservedly commended.” —C. W. DUGMORE, The Journal of Ecclesiastical History

The classic political satire about an imaginary ideal world by one of the Renaissance’s most fascinating figures. Named after a word that translates literally to “nowhere,” Utopia is an island dreamed up by Thomas More, a devout Catholic, English statesman, and Renaissance humanist who would be canonized as a saint centuries after he was executed for choosing God over king. More’s novel introduces us to Utopia’s society and its customs. It is a place of no private property and no lawyers; of six-hour workdays and simple ways; and, intriguingly, of a combination of values that blend the traditional with the highly controversial, from euthanasia to married priests to slavery. Remarkably thought-provoking, it is a novel that asks us to question what makes a perfect world—and whether such a thing is even possible.

Builds on themes and content covered at Key Stage 2 History and develops a strong course of progression through Key Stage 3 for improved performance at GCSE. Meets the requirements of the National Curriculum Programme of Study using a ready made scheme of work.

The Catholic Reformation provides a comprehensive history of the 'Counter Reformation in early modern Europe. Starting from the middle ages, Michael Mullett clearly traces the continuous transformation of the Catholic religion in its structures, bodies and doctrine. He discusses the gain in momentum of Catholic renewal from the time of the Council of Trent, and considers the profound effect of the Protestant Reformation in accelerating its renovation. This book explores how and why the Catholic Reformation occurred, stressing that moves towards restoration were underway well before the Protestant Reformation. Michael Mullett also shows the huge impact it had not only on the papacy, Church leaders and religious ritual and practice, but also on the lives of ordinary people - their culture, arts, attitudes and relationships. Ranging across the continent, The Catholic Reformation is an indispensable new survey which provides a wide-ranging overview of the religious, political and cultural history of the time. These are explored
through a reassessment of the role of humanism, with case studies in music (Josquin Desprez), moral philosophy (Valla, Castiglione, Erasmus, More) and political thought (Machiavelli)." "This book is the first in a series of three specifically designed for the Open University course, The Renaissance in Europe: A Cultural Enquiry. The series is designed to appeal both to the general reader and to those studying undergraduate arts courses in the period."--BOOK JACKET.Written by a classroom AP European History teacher who has taught both in the U.S. and abroad, Barron’s AP European History is updated to reflect the latest scoring rubrics and exam framework. The early modern and modern cultural world in the West would be unthinkable without Petrarch and Boccaccio. Despite this fact, there is still no scholarly contribution entirely devoted to analysing their intellectual revolution. Internationally renowned scholars are invited to discuss and rethink the historical, intellectual, and literary roles of Petrarch and Boccaccio between the great model of Dante’s encyclopedia and the ideas of a double or multifaceted culture in the era of Italian Renaissance Humanism. In his lyrical poems and Latin treatises, Petrarch created a cultural pattern that was both Christian and Classical, exercising immense influence on the Western World in the centuries to come. Boccaccio translated this pattern into his own vernacular narratives and erudite works, ultimately claiming as his own achievement the reconstructed unity of the Ancient Greek and Latin world in his contemporary age. The volume reconsiders Petrarch’s and Boccaccio’s heritages from different perspectives (philosophy, theology, history, philology, paleography, literature, theory), and investigates how these heritages shaped the cultural transition between the end of the Middle Ages and the early modern era, as well as European identity. This is the first in-depth study in any language exploring the vast cultural range of instrumental music during the Renaissance.
